

Shuo Wang

shuowang@u.nus.edu • [Website](#) • [GitHub](#) • [LinkedIn](#)

Computational Social Science • Digital Culture & Games • Digital Humanities

Education

National University of Singapore

M.S. Candidate

Research: computational social science, game studies, digital humanities

Singapore, Singapore

2025 – Present

Ocean University of China

B.A. in Political Science and Public Administration

Outstanding Graduate | Chuying Excellence Scholarship

Thesis: *A Text-Mining Analysis of Crisis Evolution in China's Major Disaster Accidents* (Advisor: Xue Wang)

Qingdao, China

2021 – 2025

Publications & Manuscripts

CONFERENCE CONTRIBUTIONS

Shuo Wang. 2026. Label Offensive and Defensive in Interest-Based Battlefields: Identity Politics and Public Opinion Polarization in China's ACG Communities. Accepted extended abstract, DiGRA 2026.

Shuo Wang and Bin Yi Yang. 2026. Governing Platform Entry: ASEAN States and the Politics of Chinese Esports Infrastructure. Selected for the SEASIA 2026 conference programme, Nanyang Technological University, Singapore.

CONFERENCE TALKS & POSTERS

Shuo Wang and Xue Wang^{*}. 2026. Alone in the Crowd? Urban Population Density and Loneliness Expression on Chinese Social Media. *International Conference on Computational Social Science (IC2S2 2026)*, Burlington, VT, USA. (Parallel Talk)

Shuo Wang. 2026. Who Decides What's Toxic? How Player Identity Shapes Social Perception of Toxicity in Online Game Communities. Accepted Poster, NLPercp 2026 (Workshop at ICWSM 2026).

Shuo Wang. 2025. Spatiotemporal-Aware Precise Optimization of Bus Stop Layout in Aging Urban Districts: A Multi-Objective Model Driven by STGCN. 4th "Frontiers of OR & AI in Industry" Workshop, Peking University Shenzhen. (Poster)

UNDER REVIEW

Hongyang Zhang, Yu Lu Jin, and **Shuo Wang^{*}. Institutional Blame-Shifting, Cultural Context, and the Erosion of Collective Efficacy: An LLM-Based Simulation and Survey Approach.** Under review at *Social Networks* (1st round).

Shuo Wang. De-idolization: Computational Evidence for a Multimodal Aesthetic Shift in Taiwanese Popular Music, 1990–2025. Under review at *Anthology of Computers and the Humanities*.

IN PREPARATION

Shuo Wang. A Computational Semantic Analysis of the "Neo-Confucianization" of Wang Yangming's Military Discourse. Working paper, within the *Playing Heaven* project (Schmidt Sciences HAVI).

^{*} corresponding author

Research Experience

Research Assistant | CALM Lab

National University of Singapore, Singapore

Advisor: Prof. Yumeng Hou

Built a vision-language-model (Qwen3-VL) pipeline that turns 26 early-modern manuals into structured, queryable data; modeling semantic change in Neo-Confucian concepts with contextualized embeddings.

2026 – Present

Research Assistant | PGSC Laboratory

HKUST (Guangzhou), China

Designed an automated data-validation framework for a 20+-country sustainability and carbon-metric database (Python/Pandas), cutting the error rate from 32% to 8%.

Apr – Oct 2025

Research Assistant | Institute of Public Safety and Risk Governance

Ocean University of China, Qingdao

2023 – 2025

Developed machine-learning risk-classification and early-warning models (scikit-learn, XGBoost) for public-safety scenarios; contributed to two funded projects (NSSFC 21AZZ014; Shandong NSF ZR2023QG090).

Research Assistant | Sustainable Guidelines Research Center May – Aug 2023
Central University of Finance and Economics, Beijing
Consolidated 300+ county-level climate-simulation datasets (Python/SQL) and synthesized the literature into two policy briefs.

Research Volunteer | Sustainable Development Laboratory Aug – Oct 2023
Duke Kunshan University
Classified 500+ infrared-camera images (12 species, 92% accuracy) and mapped human–wildlife interaction patterns in GIS.

Selected Independent Project

Algorithmic Selection and Value Alienation in the Esports Labor Market Ongoing
with Runyi Ma and Yining Fang
Tests whether the ladder-rank “digital meritocracy” of professional *League of Legends* delivers fairer entry, tracing entry, selection, and valuation via multi-source scraping, logistic regression, and survival analysis.

Industry Experience

Strategy Product Intern | Bilibili — Data Strategy Group Apr – Jun 2025
Product Planning Intern | Tencent — Interactive Entertainment Group Jul – Oct 2024
ACGN Operation Intern | Sina Weibo Oct 2023 – Jun 2024
Operation Intern | Hero Games — Nebula Business Unit Jun – Sep 2023

Teaching Experience

Teaching Assistant | Academic English, Ocean University of China Winter 2024
Teaching Assistant | Logic, Ocean University of China Spring 2022

Awards, Honors & Scholarships

Outstanding Graduate, Ocean University of China 2025
Chuying Excellence Scholarship, Ocean University of China 2024

Skills

Methods: NLP & text mining (LDA, contextualized embeddings), machine learning, agent- & LLM-based simulation, multimodal computer vision, survival analysis, spatial-temporal modeling
Tools: Python • SQL • Stata • SPSS • GIS • Git
Languages: Mandarin (native) • English (advanced) • Spanish (intermediate)
